

Amedia- price list 2017
www.jackshop.fi
www.amediacymbals.com.tr

Turkish handmade Amedia- cymbals from Istanbul.

Made with the old traditional long heat treatment from the **B20** -mixture!

Custom models are priced the same, as stock models.

Cymbal sizes:

Hihat- cymbals: 8"- 18"
Ride- cymbals: 16" - 26"
Crash- cymbals: 13"- 24"
Splash- cymbals: 6"- 12"
China- cymbals : 8" - 24"
Effect- hole & square cymbals: 8"- 24"

Ahmet Legend -series cymbals are very thin, weighting in thin. paper & extrathin. Also the ride cymbals "crash" easily. We also sell cymbals, which don't have a smooth turned surface, this enhances the dryness of the sound and gives the cymbal a short sustain. **Antique EFX** uses Ahmet Legend's blank. **Ancyra** -series is a bit more easy-on-the-pocket, designed to suit even beginner drummers, even though manufacturing & materials are the same as in other series'.

Antique -series cymbals offer traditional unturned surface or brushed finish! Brushed cymbals sound a bit drier. Brushed -finished crashes are weighted thin- or paperthin.

Arzat -series is heat treated dark, drier than Kommagene, darker & with shorter sustain.

Marco Baresi- series is partly planed & partly sandblasted. Crowns are hammered & these cymbals have a very versatile & rich sound.

Classic -series is a traditional turkish cymbal series, which offers all kinds of sizes and weights, from heavy to paperthin.

Dervish -series is unturned, mostly medium -weight focused series. Ride bells are usually forged & strong.

D-Rock- has planed edges and it's very sensitive. Available with bigger hammering. (thinned zone)

Eremya -series is a traditional turkish, legendary Eremya Arzat's inventened series, with a secret alloy.

Beautiful texture & a bit silver coloring.

Euphrates -series has turned & glazed edges. Bright & controlled sound.

Fusion- series is a bit different with it's ultra light forging. It's rings for a shorter time but the sound of the stick is very clear.s

Galata -series is traditional, stronger than Classic. Forged crowns & unturned belts bring character & roughness to the sound.

JazzMaster- series ride -cymbals are very thin derivate from D-series & Raw Rock -series cymbals. Great for jazz.

Kommagene -series has bright & rich tune, with a darker heat treatment finish.

Kommagene SB- series have a sandplasted surface. Rides also available with hammered crowns.

Nomad is **Jackshop's own series**, weighted paperthin and comining both lightness & smoothness, but with a bit shorter sustain and a bit drier sound.

Old School & EFX is one of the new models of Amedia Cymbals.

This serie has hammered bell, milled surface & unlathed sides.

Raw Rock- is designed for heavy use. Glossy surface.

Stingray Square- series includes "square" -shaped, quality cymbals with crash- and ride properties. The surface is unturned & the underside is turned. The only 24" cymbal which fits into a 22" bag!

Stingray Traditional -series is thinner than before-mentioned, with a forged crown & turned thin underside.

Thrace series is loved by rockers, R&B & pop drummers. Polished to high sheen & sporting a big un-hammered bell,

the Thrace series cuts through the onstage sound with shimmering high harmonics.

Tigris is the exotic sister series to the Euphrates. Lathed & polished bow, unlathed & patinated edge.

The edge has a stiff feel and the un-hammered bell clearly produces a strong fundamental.

Vigor series buffed to a high sheen for onstage flash, cymbals in the Vigor Rock Shiny series also feature a hand-hammered bell to spread out their overtones & add complexity to their sound.

Vintage line has the mysterious old-time mojo that hardcore cymbal junkies scour the world to find.

Amedia's link with the mysterious roots of Turkish cymbalmaking is master cymbalsmith Eremya Arzat.

Witness to all the secrets of the old-time cymbal-makers, his memories of the halcyon days and how cymbals were made in the old Agahaman, Istanbul factory are forged into every Amedia Vintage cymba.

We drive to store a wide selection of **Amedia Cymbals** & we deliver all factory models on-demand.

Jackshop Custom -models: **Jackshop** has designed many of it's own models, for example the new **Nomad** -series hihats & rides. We also customized cymbals, for example. You can get any cymbal with rivets or holes. We make cymbals like you want it. Contact us & ask for an offer!

Properly treated **Amedia cymbals** have a one-year factory warranty. **Nomad** -series has a 6 month warranty!
